Supply-Express

STOREROOM SOLUTIONS

IBT's **Supply-Express** service offers our customers the convenience of a self-service storeroom or tool crib via vending machines, which support Lean practices and control tool/supply usage. Best of all, managing inventory levels is automated with reorders programmed through custom max/min settings. All you need is an AC outlet and Internet connection to begin saving.

Implement a vending machine in your facility in 30 days or less. Basic vending machine supplied at no charge with base monthly MRO product purchase requirements. Machines with features such as dispensing modules, card swipe, fingerprint, or camera user access are also available.

HOW IT WORKS

1. Select the items to vend and set min/max values for each.
2. Develop a list of employees allowed access.
3. Identify who will manage the process internally.
4. Work with IT department to verify internet connectivity.
5. Determine machine configuration and reporting requirements.
6. Deliver and set-up vending machine.
7. Offer on-site training for usage and report retrieval.
8. IBT monitors usage and routinely fills machine.
