

# TIMKEN® TYPE E TAPERED ROLLER BEARING HOUSED UNIT

## *Beat Expectations. Exceed Standards.*

Manage high axial and radial loads and avoid contamination. Unlock premium performance with an unrivaled multi-point internal and external sealing solution (full range of end covers) to protect the bearing and improve grease retention.

Type E housed units feature industry-leading premium tapered roller bearings, high-performance seals, e-coated housings and locking collars. The enhanced core component design and materials improve the reliability and performance of applications in severely contaminated and wet application environments – resulting in superior performance, increased uptime, lower maintenance costs, and an overall lower cost of ownership.

## Features and Benefits

### High-Performance Seals

- Better grease retention
- Less contaminant ingress
- Better protection against water, mud and salt ingress

### Collar

- Maximum corrosion resistance
- Better locking strength
- Cuts down set screw back-out, even in severe applications

### Housing

- Superior corrosion resistance over black oxide or powder coating
- Interchangeable bolt holes and shaft centerline dimensions

### Premium Tapered Roller Bearing

- Longer bearing life
- Better performance
- Higher load capacity

# SEAL PERFORMANCE COMPARISON

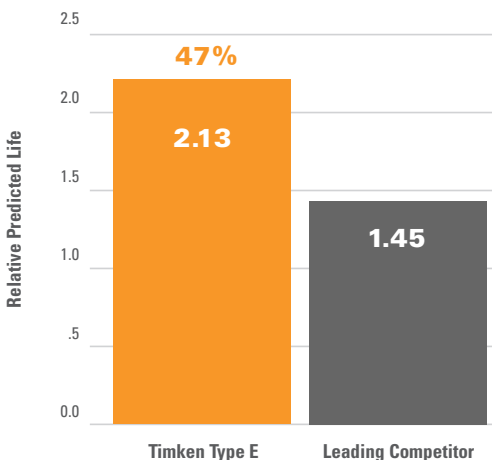

Compared to the leading competitor's seal, our triple-barrier internal seal is more effective, resulting in 7 times less water and 40% less mud/salt slurry contamination ingress.

## BEARING LIFE ANALYSIS COMPARISON

### 47% Longer Life with Optimized Timken Tapered Roller Bearings Versus Competition

Type E bearing yields a design life that is 47 percent higher than the current industry leading competitor.

Analysis of the optimized Timken bearing compared to the leading competitor's bearing and most other Type E competitors. Note: Life tests of Timken tapered roller bearings verified by Germanischer Lloyd.

## WHICH SEAL PROVIDES BETTER PROTECTION?

### Timken® Type E High-Performance Seal\*

1. Outboard contact lip provides initial protection from ingress
2. Labyrinth, non-contact rigid barrier
3. Inboard contact lip provides secondary protection from ingress

*Double-lip and triple-barrier system optimizes sealing.*

### Leading Competitor Triple-Lip Seal\*

1. Outboard lip contacts back of machined collar and will wear quickly, impacting effectiveness of the lip
2. Labyrinth, non-contact
3. Single-lip contact to protect the bearing from ingress

*Essentially operates as a single-lip seal.*

# TIMKEN

The Timken team applies their know-how to improve the reliability and performance of machinery in diverse markets worldwide. The company designs, makes and markets bearings, gear drives, automated lubrication systems, belts, brakes, clutches, chain, couplings, linear motion products and related power transmission rebuild and repair services.

**Stronger. By Design.**
