

# Engineered Shaft Locking Solutions ™

Since 1946, Climax Metal Products Company has grown into the leading source for engineered shaft locking solutions by providing outstanding customer service.

Climax shaft collars and rigid couplings have been used in a variety of applications in all major industries. In June 2011, Climax entered into an exclusive agreement with MAV S.p.A. of Bosentino, Italy to market and sell MAV's keyless locking devices in the North American market. MAV has been a worldwide leader in the design and manufacture of keyless locking devices and related products for over 30 years.

Climax shaft collars, rigid couplings and keyless locking devices are manufactured with unsurpassed quality and stocked by distributors throughout North America. Our manufacturing capabilities allow us to ensure timely deliveries for both cataloged items and specials that meet your specifications. We appreciate your interest.

## **SHAFT COLLARS**

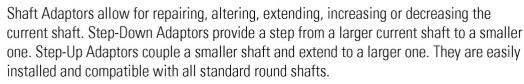

Shaft Collars are used to position or loacte a Shaft collars are used to position or locate a component on a shaft. In addition, collars can be used to limit the travel of a shaft in reciprocating applications, or used as a spacer between components. Climax Metal Products Company provides a broad assortment of shaft collars to suit many customer applications. Climax collars fit imperial shaft sizes from 1/16" through 6". Metric shaft collars fit shaft sizes ranging from 2mm to 80mm. Shaft collars are made from mild steel, type 303 or 316 stainless steel, aluminum, or acetal. Steel collars are available in multiple finishes — black oxide, clear zinc, or yellow zinc dichromate

Set Screw	One-Piece	Two-Piece
Most economical collar design	Additional holding power over set screw collars	Additional holding power over one-piece collars
Single cup point set screw impinges on the shaft	Single recessed or non-recessed tangential screw does not mar the shaft	Two recessed or non-recessed tangential screws do not mar the shaft
Requires disassembly of shaft components upon replacement	Requires disassembly of shaft components upon replacement	Replace without major disassembly of other components

# **RIGID COUPLINGS**

Shaft couplings serve as components to time, join, or align shafts at lower speeds and torque, especially when zero backlash is desired. Climax Metal Products provides a broad assortment of rigid shaft couplings to suit many customer applications. Climax rigid couplings fit imperial shaft sizes from ¼" to 2 ¼" and metric shaft sizes from 6mm to 50mm. Rigid couplings are made from mild steel with a black oxide finish or type 303 stainless steel. A limited selection of shaft couplings is offered using aluminum material. Couplings are manufactured with and without keyways. Step-bore couplings are also available to attach two shafts of differing sizes.

Set Screw	One-Piece	Two-Piece
The most economical rigid coupling design	4 socket head cap screws provide holding power	8 socket head cap screws provide the holding power
Cup point set screws impinge the shaft provides the holding power	Additional holding power over set screw couplings	Additional holding power over one-piece
Available with 4 set screws for extra holding power	Requires disassembly of shaft components upon replacement	Install/Replace without disassembly of other shaft components
Requires disassembly of shaft components upon replacement		Re-machinable couplings available for economical custom bores

#### **KEYLESS LOCKING DEVICES**

Keyless Locking Devices (KLDs) are mechanical bushings used to connect power transmission components onto rotating shafts. Without the use of keyways, KLDs eliminate the problems associated with backlash including fretting, corroding, and wallowing.

KLDs work with straight bores and generous tolerances, reducing component machining and complexity cost. In addition, KLDs are installed and removed using simple hand tools; no heat or high forces are required.

In June 2011, Climax entered an exclusive agreement with MAV S.p.A. of Bosentino, Italy to market and sell MAV's Keyless Locking Devices in the North American market. Perched on a hillside in the breathtaking Dolomites, the foothills of the Alps, MAV has been a worldwide leader in the design and manufacture of Keyless Locking Devices and related products for over 30 years.

By joining forces, Climax and MAV offer the North American OEM and industrial distribution markets an unparalleled combination of product quality, extensive inventory, design and application acumen, and flexible manufacturing with attractive lead times. Together we have unsurpassed knowledge about KLDs and their applications.

Keyless Locking Assemblies	Shrink Discs
Internal bushings installed between the shaft and the component bore, capable of transmitting high torque, thrust and bending loads	External locking device mounted on the outside of an hub or hollow shaft, compressing it onto the driven shaft. Most typical application is hollow shaft gearbox
As the high-strength screws are tightened, tapers simultaneously apply radial force on the shaft and the component bore creating a high pressure mechanical Interference fit	As the screws are tightened, tapers create a radial force on the hollow shaft compressing it onto the driven shaft creating a high pressure mechanical interference fit
No key means infinite angular and axial positioning for precise alignment and timing	Keyless so infinite timing capability as well as easily mounted and removed with ordinary hand tools
Easily mounted and removed in the field with standard hand tools	Outer rings are supplied zinc plated for added corrosion protection

## **IBT BRANCH LOCATIONS:**

619 Strong Highway, El Dorado, AR 870-862-3443 5515 Jefferson Parkway, Pine Bluff, AR 870-247-5900 1802 South Park Avenue, Stuttgart, AR 870-672-7299 3218 Northbrook Drive, Ste. B, Sioux City, IA 712-255-5555 601 South Tenth Street, Mt. Vernon, IL 618-244-5353 4291 South Santa Fe, Chanute, KS 620-431-0900 2311 West Eighth Street, Coffeyville, KS 620-251-9300 6060 South 2nd Avenue, Dodge City, KS 620-227-2340 1923 West 6th Avenue, Emporia, KS 620-343-6161 3845 West Jones Avenue, Garden City, KS 620-277-2135 5101 8th Street, Lawrence, KS 785-841-5771 2503 East 14th Street, Hutchinson, KS 620-662-4446 516 East 8th Street, Lawrence, KS 785-841-5771 633 South Kansas Avenue, Liberal, KS 620-624-6558 9400 West 55th Street, Merriam, KS 913-677-3151 305 East Crane Street, Topeka, KS 785-233-1381 5819 West Harry Street, Wichita, KS 316-943-3434 2231-B Centennial Road, Salina, KS 785-825-6234
