

LIGHTWEIGHT PRODUCTS

LIGHTWEIGHT THERMOPLASTIC | NYLON CORE | PLASTIC MODULAR BELTING

Lightweight Thermoplastic Conveyor Belts

— *In-stock and ready for immediate delivery*

Cover compounds and surface textures are offered for a variety of applications: food processing, packaging, logistics, metal stamping, recycling, building materials and pharmaceuticals.

Polyurethane

PVC

Silicone

Polyolefin

Non-Woven

Nitrile

Teflon

Hytre

Polyurethane belts manufactured by Reveyron®

- Excellent dimensional stability
- Meets FDA and EU regulations
- Can be used in a wide range of applications
- Belts lay absolutely flat with no edge curling
- Exceptional splice quality
- Several specifications are ideal for corrugated sidewall and/or cleat fabrications

Delivers better overall performance

PolyBelt™
Nylon Core

PolySprint™
Printing

Carryflex™
Live Roller

Nitta stands alone as the only vertically integrated US manufacturer of flat power transmission belting.

Movex®

Moving through innovation

Movex® designs and manufactures high quality conveyor belts and components for the beverage, packaging and automotive industries.

- Modular Belts
- Belt Sprockets
- Steel Chains
- Plastic Chains
- Sprockets & Idler Wheels
- Conveyor Components
- Return Components
- Support Components
- Bearings Supports
- Leveling Pads
- Profile UHMW-PE & BluLub

MODUTECH®

Food grade modular belting

Designed specifically for the food industry, our Modutech® plastic modular belts combat challenges often faced in food applications. Made using high-quality molding and materials, these belts can be used in food processing and food packaging.

The hygienic design of these belts reduces cleaning issues common to plastic modular products. Enhanced belt strength and precise sprocket engagement reduce unscheduled downtime and product damage.

Our complete line of modular belts, chains and conveyor belt components are compatible with other manufacturers' products.

When the most direct route isn't a straight line

ProTurn® replacement belts are fabricated to your customers' exact specifications with all guidance hardware installed.

Belts for 45°, 90°, 180° and spiral lift applications include either chain, urethane bead or bearing/wheel guide systems attached and ready for service.

High speed operations and strict safety standards are a way of life for facility managers at airports and around-the-clock package sorting facilities. When faced with a choice of endless conveyor belt options, distributors can be certain we stock an excellent selection of high performance products.

Easily spliced at any length

ZipLink is a breakthrough in belting design that combines time tested rubber cover materials with a structured spiral link mesh that can be easily spliced at any length into a continuous belt without the need for special tools, presses or other equipment.

ZipLink's construction eliminates points of weakness because there is no loss of strength in the splice area, making the belts stronger so they last longer than other seamed or fused materials.

PRO
CLEAN®

Optimize performance with an easy to clean belt

ProClean® PD (Positive Drive) belts replace plastic modular belts in the food processing industry and optimize your conveyor's performance with a low tension belt system.

FLAT BELTING

SOFT HINGE LACING

DRIVE BAR

ProClean® FB (Flat Belt) products have a 100% closed surface, homogeneous thermoplastic structure and smooth or textured surfaces.

Performance

Detectable Products

Advanced belting with a "safety net"

XRAYTHANE

An exclusive blend of FDA compliant metal detectable thermoplastic resins.

An X-ray detectable urethane material. Extremely durable with low maintenance and low stretch.

Fabrications

Lacing and splicing is offered in a variety of options

In addition to lacing and traditional splicing, we have a variety of value added fabrications to choose from.

Finger Splice

ProSeal Edge Cap

Perforations

Cleating

High Frequency / Welded / Cast

Thermoplastic Corrugated Sidewall

PVC / PU V-Guides

Mechanical Lacing

- Flexco Clipper
- Plastic Spiral
- Flexco Alligator
- Soft Splice

Laminations

- Black Neoprene
- Neoprene Foam
- Gum Rubber
- Urethane Foam
